Education

Lakshmi Narain College Of Technology

Nov 2021 - June 2025

Bachelor of Technology in Computer Science Engineering(CGPA of 8.6)

Bhopal, India

Experience

AICTE Idea Lab

Oct 2022 – Dec 2022

Mobile Application Developer

Bhopal India

- Created cross-platform mobile applications using the **Flutter framework, leveraging the Dart programming language and Android Studio (Java)** for development. Worked closely with the team to meet project deadlines successfully. Additionally, delivered **presentations** to share project progress, updates, and findings.
- Employed **responsive UI design principles**, implemented efficient state management solutions, and integrated various packages to optimize app performance and user experience.

Young India (YI)

Jan 2023 – Mar 2023

Mobile Application Developer Intern

Bhopal India

- Developed an inclusive educational app that empowers **underprivileged** individuals by offering accessible courses, quizzes and personalized certifications, fostering lifelong learning and skill development.
- Employed **Android (Java)** for rapid development process and used multiple APIs to make it faster.

Pyramid Developers

Apr 2023 – present

Mobile Application Developer Intern

Remote

- Built and maintained cross-platform Flutter applications, focusing on responsive **UI design, BLoC state management**, and integrating 10+ packages for optimized performance, wrote custom UI components to reduce the app size by 10 % and increased app performance by atleast 20%.
- Collaborated effectively with remote teams to ensure timely project delivery, shared best practices, and adapted to the unique needs of startup environments.

Projects

Medi-Gaze | Flutter, Dart, Firebase | Project Link (December 2022)

4

- Developed a medicine search app** using **Flutter and Dart**, allowing users to search for specific medicines by connecting directly with retailers of pharmacy stores. The app eliminates the need for physically visiting multiple shops, saving users time and effort.
- Leveraged **Firebase Authentication and Cloud Messaging services** to ensure secure user authentication and enable **real-time notifications** for order updates, delivery status, and other important information. The integration of Firebase enhances the app's functionality and provides a seamless user experience.

Sakhi (SOS App) | Flutter, Dart, Firebase, EmailJS | Project Link (March 2023)

4

- The app ensures **user safety in emergencies** by sending distress messages to nearby community members. It allows users to report harassment cases, backed by **EmailJS**, and provides access to news on women's harassment.
- The SOS app features a help button for immediate distress alerts to nearby community members. It sends help messages via **Firebase Cloud Messaging**. It is a **cross-platform app**, reducing development time for different operating systems by at least 50%.

Achievements

- Winner of a track at Hack2Educate Hackathon, a hackathon by MLH**, in December 2022. Collaborated with teammates to create an educational website.
- Accomplished **400+** coding questions, refining problem-solving skills and deepening algorithmic knowledge.
- Authored and published 50+ detailed solutions on LeetCode**, providing valuable insights and assistance to **over 300 individuals** seeking help and guidance in solving coding problems.
- Achieved **1st University Rank on InterviewBit**.
- Actively involved in the App Developers Community on Telegram**, offering mentoring and support to **over 50 students** in their app development journey.
